## MATERIAL SAFETY DATA SHEET **DEWALT YELLOW**

Version Number 1.1 Revision Date 05/20/2008 Page 1 of 8 Print Date <u>1/3/2012</u>

#### 1. PRODUCT AND COMPANY IDENTIFICATION

#### POLYONE CORPORATION 33587 Walker Road, Avon Lake, OH 44012

| Telephone:Emergency telephone: | Product Stewardship (770) 271-5902<br>CHEMTREC 1-800-424-9300 (24hrs for spill, leak, fire, exposure<br>or accident). |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Product name :                 | DEWALT YELLOW                                                                                                         |
| Product code :                 | CC10085285                                                                                                            |
| Chemical Name :                | Mixture                                                                                                               |
| CAS-No. :                      | Mixture                                                                                                               |
| Product Use :                  | Industrial Applications                                                                                               |

### 2. COMPOSITION/INFORMATION ON REGULATED INGREDIENTS

| Components                                                                   | CAS-No.     | Weight % |
|------------------------------------------------------------------------------|-------------|----------|
| Formamide, N,N'-1,6-hexanediylbis[N-<br>(2,2,6,6-tetramethyl-4-piperidinyl)- | 124172-53-8 | 5 - 10   |
| Cadmium selenide (CdSe)                                                      | 1306-24-7   | 0.1 - 1  |
| Barium sulfate                                                               | 7727-43-7   | 1 - 5    |
| Zinc stearate                                                                | 557-05-1    | 1 - 5    |
| Cadmium sulfide                                                              | 1306-23-6   | 10 - 30  |

#### **3. HAZARDS IDENTIFICATION**

#### **EMERGENCY OVERVIEW**

This mixture has not been evaluated as a whole. Information provided on the health effects of this product is based on individual components. All ingredients are bound and potential for hazardous exposure as shipped is minimal. However, some vapors may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure.

#### POTENTIAL HEALTH EFFECTS

| Routes of Exposure: | : Inhalation, Ingestion, Skin contact                                               |
|---------------------|-------------------------------------------------------------------------------------|
| Acute exposure      |                                                                                     |
| Inhalation          | : Resin particles, like other inert materials, can be mechanically irritating.      |
| Ingestion           | : May be harmful if swallowed.                                                      |
| Eyes                | : Resin particles, like other inert materials, are mechanically irritating to eyes. |
| Skin                | : Experience shows no unusual dermatitis hazard from routine handling.              |

| Medical Conditions           | •    | None known.                                                                                                                                                                         |
|------------------------------|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aggravated by Exposure:      | ·    |                                                                                                                                                                                     |
|                              |      | 4. FIRST AID MEASURES                                                                                                                                                               |
| Inhalation                   | :    | Move to fresh air in case of accidental inhalation of fumes from<br>overheating or combustion. When symptoms persist or in all cases of<br>doubt seek medical advice.               |
| Ingestion                    | :    | Do not induce vomiting without medical advice. When symptoms persist or in all cases of doubt seek medical advice.                                                                  |
| Eyes                         | :    | Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists, seek medical attention.                                        |
| Skin                         | :    | Wash off with soap and plenty of water. If skin irritation persists seek medical attention.                                                                                         |
|                              |      | 5. FIRE-FIGHTING MEASURES                                                                                                                                                           |
| Flash point                  | :    | Not applicable                                                                                                                                                                      |
| Flammable Limits             |      |                                                                                                                                                                                     |
| Upper explosion limit        | :    | Not applicable                                                                                                                                                                      |
| Lower explosion limit        | :    | Not applicable                                                                                                                                                                      |
| Autoignition temperature     | :    | Not applicable                                                                                                                                                                      |
| Suitable extinguishing media | •    | Carbon dioxide blanket, Water spray, Dry powder, Foam.                                                                                                                              |
| Special Fire Fighting        |      | Fullface self-contained breathing apparatus (SCBA) used in positive                                                                                                                 |
| Procedures                   | •    | pressure mode should be worn to prevent inhalation of airborne                                                                                                                      |
|                              |      | contaminants.                                                                                                                                                                       |
| Unusual Fire/Explosion       | :    | Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen                                                                                                                      |
| Hazards                      |      | (NOx), other hazardous materials, and smoke are all possible.                                                                                                                       |
|                              | 6. A | CCIDENTAL RELEASE MEASURES                                                                                                                                                          |
| Personal precautions         | :    | Wear appropriate personal protection during cleanup, such as                                                                                                                        |
|                              |      | impervious gloves, boots and coveralls.                                                                                                                                             |
| Environmental precautions    | :    | Should not be released into the environment. The product should not be allowed to enter drains, water courses or the soil.                                                          |
| Methods for cleaning up      | :    | Clean up promptly by sweeping or vacuum. Package all material in plastic, cardboard or metal containers for disposal. Refer to Section 13 of this MSDS for proper disposal methods. |

### **11. TOXICOLOGICAL INFORMATION**

This mixture has not been evaluated as a whole for health effects. Exposure effects listed are based on existing health data for the individual components which comprise the mixture.

#### **Toxicity Overview**

This product contains the following components which in their pure form have the following characteristics:

| CAS-No.     | Chemical Name               | Effect           | Target Organ                  |
|-------------|-----------------------------|------------------|-------------------------------|
| 124172-53-8 | Formamide, N,N'-1,6-        | Irritant         | Eyes.                         |
|             | hexanediylbis[N-(2,2,6,6-   |                  |                               |
|             | tetramethyl-4-piperidinyl)- |                  |                               |
| 1306-24-7   | Cadmium selenide (CdSe)     | Highly Toxic     | Refer to LC50 / LD50 Data on  |
|             |                             |                  | MSDS                          |
|             |                             | Systemic effects | Liver, central nervous system |
|             |                             |                  | (CNS), Kidney.                |
| 7727-43-7   | Barium sulfate              | Irritant         | Respiratory system.           |
|             |                             | Systemic effects | Eyes, Respiratory system.     |
| 557-05-1    | Zinc stearate               | Systemic effects | Eyes, Skin, Respiratory       |
|             |                             |                  | system.                       |
| 1306-23-6   | Cadmium sulfide             | Highly Toxic     | Refer to LC50 / LD50 Data on  |
|             |                             |                  | MSDS                          |

#### LC50 / LD50

This product contains the following components which, in their pure form, have the following toxicity data:

| CAS-No.     | Chemical Name               | Route     | Value         | Species |
|-------------|-----------------------------|-----------|---------------|---------|
| 124172-53-8 | Formamide, N,N'-1,6-        | LC50      | > 5.0 mg/l    | rat     |
|             | hexanediylbis[N-(2,2,6,6-   | Oral LD50 | > 2,000 mg/kg | rat     |
|             | tetramethyl-4-piperidinyl)- |           |               |         |
| 557-05-1    | Zinc stearate               | Oral LD50 | >10 gm/kg     | rat     |
| 1306-23-6   | Cadmium sulfide             | Oral LD50 | 7,080 mg/kg   | rat     |

Carcinogenicity

\_

This product contains the following components which, in their pure form, have the following carcinogenicity data:

| CAS-No.   | Chemical Name           | OSHA | IARC | NTP |
|-----------|-------------------------|------|------|-----|
| 1306-24-7 | Cadmium selenide (CdSe) | yes  | 1    | no  |
| 1306-23-6 | Cadmium sulfide         | yes  | 1    | no  |

IARC Carcinogen Classifications:

1 - The component is carcinogenic to humans.

2A - The component is probably carcinogenic to humans.

2B - The component is possibly carcinogenic to humans.

NTP Carcinogen Classifications:

1 - The component is known to be a human carcinogen.

2 - The component is reasonably anticipated to be a human carcinogen.

#### Additional Health Hazard Information:

Cadmium selenide (CdSe) 1306-24-7 Can produce rapid and sometimes fatal pulmonary edema. Chronic absorption leads to liver and kidney damage.

#### Additional Health Hazard Information:

Cadmium sulfide 1306-23-6 Can produce rapid and sometimes fatal pulmonary edema. Chronic absorption leads to liver and kidney damage.
