### Section 2. Hazards identification

This mixture has not been evaluated as a whole for health effects. Information provided on health effects of this product is based on the individual components. However, some vapors or contaminants may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure. See sections 8 and 11 for special precautions. After handling, always wash hands thoroughly with soap and water.

| OSHA/HCS status                            | : | While this material is not considered hazardous by the OSHA Hazard<br>Communication Standard (29 CFR 1910.1200), this SDS contains<br>valuable information critical to the safe handling and proper use of the<br>product. This SDS should be retained and available for employees and<br>other users of this product. |
|--|---|--|
| Classification of the substance or mixture | : | Not classified.  |

|              | upper and lower eyelids. Check for and remove any contact lenses.       |
|--------------|---|
|              | Get medical attention if irritation occurs.                             |
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable |
|              | for breathing. Get medical attention if symptoms occur.                 |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated     |
|              | clothing and shoes. Get medical attention if symptoms occur.            |
| Ingestion    | : Wash out mouth with water. Remove victim to fresh air and keep at     |
|              | rest in a position comfortable for breathing. If material has been      |
|              | swallowed and the exposed person is conscious, give small quantities    |
|              | of water to drink. Do not induce vomiting unless directed to do so by   |
|              | medical personnel. Get medical attention if symptoms occur.             |

#### Most important symptoms/effects, acute and delayed

### Potential acute health effects

| Eye contact<br>Inhalation<br>Skin contact<br>Ingestion<br><u>Over-exposure signs/symptoms</u> | <ul> <li>No known significant effects or critical hazards.</li> </ul> |
|---|--|
| Eye contact   | : No specific data.  |
| Inhalation  | : No specific data.  |
| Skin contact  | : No specific data.  |
| Ingestion   | : No specific data.  |
| Indication of immediate medica  | l attention and special treatment needed, if necessary   |
| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.  |
| Specific treatments   | : No specific treatment.   |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training.   |

See toxicological information (Section 11)

## **Section 5. Fire-fighting measures**

#### Extinguishing media

| Suitable extinguishing media   | : | In case of fire, use water spray (fog), foam, dry chemical or CO <sub>2</sub> . |
|--------------------------------|---|---|
| Unsuitable extinguishing media | : | None known.   |

PolyOne. gsdi

Version Number 1.0 Revision Date 05/02/2016 Page 4 of 15 Print Date 05/03/2016

| Specific hazards arising from the<br>chemical<br>Hazardous thermal<br>decomposition products | : | In a fire or if heated, a pressure increase will occur and the container<br>may burst.<br>Decomposition products may include the following materials:<br>sulfur oxides<br>metal oxide/oxides      |
|--|---|---|
| Special protective actions for fire-<br>fighters   | : | Promptly isolate the scene by removing all persons from the vicinity<br>of the incident if there is a fire. No action shall be taken involving any<br>personal risk or without suitable training. |
| Special protective equipment for fire-fighters   | : | Fire-fighters should wear appropriate protective equipment and self-<br>contained breathing apparatus (SCBA) with a full face-piece operated<br>in positive pressure mode.                        |

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel<br>For emergency responders | :    | No action shall be taken involving any personal risk or without<br>suitable training. Evacuate surrounding areas. Keep unnecessary and<br>unprotected personnel from entering. Do not touch or walk through<br>spilled material. Put on appropriate personal protective equipment.<br>If specialised clothing is required to deal with the spillage, take note of<br>any information in Section 8 on suitable and unsuitable materials. See<br>also the information in "For non-emergency personnel".             |
|---|------|---|
| Environmental precautions                               | :    | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for containme                     | nt a | nd cleaning up  |
| Small spill   | :    | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill   | :    | Stop leak if without risk. Move containers from spill area. Prevent<br>entry into sewers, water courses, basements or confined areas. Wash<br>spillages into an effluent treatment plant or proceed as follows.<br>Contain and collect spillage with non-combustible, absorbent material<br>e.g. sand, earth, vermiculite or diatomaceous earth and place in<br>container for disposal according to local regulations (see Section 13).<br>Dispose of via a licensed waste disposal contractor. Note: see Section |

PolyOne. gsdi

### Page 5 of 15 Print Date 05/03/2016

1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures<br>Advice on general occupational<br>hygiene | : | Put on appropriate personal protective equipment (see Section 8).<br>Eating, drinking and smoking should be prohibited in areas where this<br>material is handled, stored and processed. Workers should wash hands<br>and face before eating, drinking and smoking. Remove contaminated<br>clothing and protective equipment before entering eating areas. See<br>also Section 8 for additional information on hygiene measures.   |
|--|---|--|
| Conditions for safe storage,<br>including any incompatibilities  | : | Store in accordance with local regulations. Store in original container<br>protected from direct sunlight in a dry, cool and well-ventilated area,<br>away from incompatible materials (see Section 10) and food and<br>drink. Keep container tightly closed and sealed until ready for use.<br>Containers that have been opened must be carefully resealed and kept<br>upright to prevent leakage. Do not store in unlabeled containers. Use<br>appropriate containment to avoid environmental contamination. |

## **Section 8. Exposure controls/personal protection**

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name  | Exposure limits   |
|------------------|---|
| Titanium dioxide | OSHA PEL 1989 (1989-03-01)                                  |
|                  | PEL: Permissible Exposure Level 10 mg/m3 Form: Total dust   |
|                  | OSHA PEL (1993-06-30)                                       |
|                  | PEL: Permissible Exposure Level 15 mg/m3 Form: Total dust   |
|                  | NIOSH REL (1994-06-01)                                      |
|                  | ACGIH TLV (1996-05-18)                                      |
|                  | TLV-TWA: Threshold Limit Value - Time weighted average PEL: |
|                  | Permissible Exposure Level 10 mg/m3                         |
|                  |   |
| Carbon black     | OSHA PEL 1989 (1989-03-01)                                  |
|                  | PEL: Permissible Exposure Level 3.5 mg/m3                   |
|                  | OSHA PEL (1993-06-30)                                       |
|                  | PEL: Permissible Exposure Level 3.5 mg/m3                   |

Version Number 1.0 Revision Date 05/02/2016

|   |   | NIOSH REL (1994-06-01)<br>Time Weighted Average (TWA) 3.5 mg/m3<br>Time Weighted Average (TWA)<br>ACGIH TLV (2010-12-06)<br>TLV-TWA: Threshold Limit Value - Time weighted average PEL:<br>Permissible Exposure Level 3 mg/m3 Form: Inhalable fraction  |
|---|---|---|
| Appropriate engineering controls<br>Environmental exposure controls | : | Good general ventilation should be sufficient to control worker<br>exposure to airborne contaminants.<br>Emissions from ventilation or work process equipment should be<br>checked to ensure they comply with the requirements of<br>environmental protection legislation. In some cases, fume scrubbers,<br>filters or engineering modifications to the process equipment will be<br>necessary to reduce emissions to acceptable levels.   |
| Individual protection measures                                      |   |   |
| Hygiene measures<br>Eye/face protection                             | : | Wash hands, forearms and face thoroughly after handling chemical<br>products, before eating, smoking and using the lavatory and at the end<br>of the working period. Appropriate techniques should be used to<br>remove potentially contaminated clothing. Wash contaminated<br>clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.<br>Safety eyewear complying with an approved standard should be used<br>when a risk assessment indicates this is necessary to avoid exposure to<br>liquid splashes, mists, gases or dusts. If contact is possible, the<br>following protection should be worn, unless the assessment indicates a<br>higher degree of protection: safety glasses with side-shields. |
| Skin protection   |   |   |
| Hand protection<br>Body protection                                  | : | Chemical-resistant, impervious gloves complying with an approved<br>standard should be worn at all times when handling chemical products<br>if a risk assessment indicates this is necessary.<br>Personal protective equipment for the body should be selected based<br>on the task being performed and the risks involved and should be  |
| Other skin protection   | : | approved by a specialist before handling this product.<br>Appropriate footwear and any additional skin protection measures<br>should be selected based on the task being performed and the risks<br>involved and should be approved by a specialist before handling this<br>product.  |
| Respiratory protection  | : | Use a properly fitted, air-purifying or air-fed respirator complying<br>with an approved standard if a risk assessment indicates this is<br>necessary. Respirator selection must be based on known or anticipated<br>exposure levels, the hazards of the product and the safe working limits  |

PolyOne. gsdi

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and
