# Section 2. Hazards identification

This mixture has not been evaluated as a whole for health effects. Information provided on health effects of this product is based on the individual components. However, some vapors or contaminants may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure. See sections 8 and 11 for special precautions. Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

| OSHA/HCS status                            | : | This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). |
|--|---|---|
| Classification of the substance or mixture | : | SKIN IRRITATION - Category 2<br>SERIOUS EYE DAMAGE - Category 1                                     |

|-------------------------------|---|------------|
| Chemical name                 | : | Mixture    |
| Other means of identification | : | FO20035082 |

CAS number/other identifiers

| Ingredient name | %       | CAS number |
|-----------------|---------|------------|
| Calcium oxide   | 10 - 20 | 1305-78-8  |
|                 |         |            |
|                 |         |            |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

PolyUne

# Geon™ V9531 Adhesive Plastisol

Version Number 1.2 Revision Date 01/09/2020 Page 3 of 17 Print Date 01/23/2020

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : | Get medical attention immediately. Call a poison center or physician.<br>Immediately flush eyes with plenty of water, occasionally lifting the<br>upper and lower eyelids. Check for and remove any contact lenses.<br>Continue to rinse for at least 10 minutes. Chemical burns must be<br>treated promptly by a physician.   |
|--------------|---|--|
| Inhalation   | : | Get medical attention immediately. Call a poison center or physician.<br>Remove victim to fresh air and keep at rest in a position comfortable<br>for breathing. If it is suspected that fumes are still present, the rescuer<br>should wear an appropriate mask or self-contained breathing<br>apparatus. If not breathing, if breathing is irregular or if respiratory<br>arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give<br>mouth-to-mouth resuscitation. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open<br>airway. Loosen tight clothing such as a collar, tie, belt or waistband.   |
| Skin contact | : | Get medical attention immediately. Call a poison center or physician.<br>Flush contaminated skin with plenty of water. Remove contaminated<br>clothing and shoes. Wash contaminated clothing thoroughly with<br>water before removing it, or wear gloves. Continue to rinse for at least<br>10 minutes. Chemical burns must be treated promptly by a physician.<br>Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion    | : | Get medical attention immediately. Call a poison center or physician.<br>Wash out mouth with water. Remove dentures if any. Remove victim<br>to fresh air and keep at rest in a position comfortable for breathing. If<br>material has been swallowed and the exposed person is conscious,<br>give small quantities of water to drink. Stop if the exposed person<br>feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the<br>head should be kept low so that vomit does not enter the lungs.<br>Chemical burns must be treated promptly by a physician. Never give<br>anything by mouth to an unconscious person. If unconscious, place in<br>recovery position and get medical attention immediately. Maintain an<br>open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

# Geon™ V9531 Adhesive Plastisol

Version Number 1.2 Revision Date 01/09/2020 Page 4 of 17 Print Date 01/23/2020

| Eye contact                        | :      | Causes serious eye damage.   |
|------------------------------------|--------|--|
| Inhalation                         | :      | No known significant effects or critical hazards.  |
| Skin contact                       | :      | Causes skin irritation.  |
| Ingestion                          | :      | No known significant effects or critical hazards.  |
| Over-exposure signs/symptoms       |        |  |
| Eye contact                        | :      | Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
| Inhalation                         | :      | No specific data.  |
| Skin contact                       | :      | Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur   |
| Ingestion                          | :      | Adverse symptoms may include the following: stomach pains  |
| Indication of immediate medical at | tentic | on and special treatment needed, if necessary  |
| Notes to physician                 | :      | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.  |
| Specific treatments                | :      | No specific treatment.   |
| Protection of first-aiders         | :      | No action shall be taken involving any personal risk or without<br>suitable training. If it is suspected that fumes are still present, the<br>rescuer should wear an appropriate mask or self-contained breathing<br>apparatus. It may be dangerous to the person providing aid to give<br>mouth-to-mouth resuscitation. Wash contaminated clothing<br>thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

# **Section 5. Firefighting measures**

#### **Extinguishing media**

| Suitable extinguishing media<br>Unsuitable extinguishing media     | : | In case of fire, use water spray (fog), foam, dry chemical or $\rm CO_2$ .<br>None known.                                |
|--|---|--|
| Specific hazards arising from the<br>chemical<br>Hazardous thermal | : | In a fire or if heated, a pressure increase will occur and the container may burst.<br>May emit Hydrogen Chloride (HCl). |
|  |   | 4/17   |

| Version Number 1.2       | Page 5 of 17          |
|--------------------------|-----------------------|
| Revision Date 01/09/2020 | Print Date 01/23/2020 |

| decomposition products                           | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>halogenated compounds<br>metal oxide/oxides   |
|--|---|
| Special protective actions for fire-<br>fighters | Promptly isolate the scene by removing all persons from the vicinity<br>of the incident if there is a fire. No action shall be taken involving any<br>personal risk or without suitable training. |
| Special protective equipment for fire-fighters   | : Fire-fighters should wear appropriate protective equipment and self-<br>contained breathing apparatus (SCBA) with a full face-piece operated<br>in positive pressure mode.                      |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel<br>For emergency responders | :     | No action shall be taken involving any personal risk or without<br>suitable training. Evacuate surrounding areas. Keep unnecessary and<br>unprotected personnel from entering. Do not touch or walk through<br>spilled material. Do not breathe vapor or mist. Provide adequate<br>ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.<br>If specialized clothing is required to deal with the spillage, take note<br>of any information in Section 8 on suitable and unsuitable materials.<br>See also the information in "For non-emergency personnel". |
|---|-------|---|
| Environmental precautions                               | :     | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for containm                      | ent a | nd cleaning up  |
| Small spill   | :     | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill   | :     | Stop leak if without risk. Move containers from spill area. Approach<br>release from upwind. Prevent entry into sewers, water courses,<br>basements or confined areas. Wash spillages into an effluent treatment<br>plant or proceed as follows. Contain and collect spillage with non-<br>combustible, absorbent material e.g. sand, earth, vermiculite or<br>diatomaceous earth and place in container for disposal according to  |
|   |       | <b>E</b> /4 <b>7</b>  |

local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures   | : | Put on appropriate personal protective equipment (see Section 8). Do<br>not get in eyes or on skin or clothing. Do not breathe vapor or mist.<br>Do not ingest. If during normal use the material presents a respiratory<br>hazard, use only with adequate ventilation or wear appropriate<br>respirator. Keep in the original container or an approved alternative<br>made from a compatible material, kept tightly closed when not in use.<br>Empty containers retain product residue and can be hazardous. Do not<br>reuse container. |
|---|---|--|
| Advice on general occupational<br>hygiene                       | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any incompatibilities | : | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store in a well-ventilated place. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.           |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name | Exposure limits        |  |
|-----------------|------------------------|--|
| Calcium oxide   | ACGIH TLV (1994-09-01) |  |
|                 | TWA 2 mg/m3            |  |
|                 | NIOSH REL (1994-06-01) |  |

<u>PolyOne</u>

# Geon™ V9531 Adhesive Plastisol

### Page 7 of 17 Print Date 01/23/2020

|                                  |   | TWA 2 mg/m3<br>OSHA PEL 1989 (1989-03-01)<br>TWA 5 mg/m3<br>OSHA PEL (1993-06-30)<br>TWA 5 mg/m3   |
|----------------------------------|---|--|
| Appropriate engineering controls | : | If user operations generate dust, fumes, gas, vapor or mist, use process<br>enclosures, local exhaust ventilation or other engineering controls to<br>keep worker exposure to airborne contaminants below any<br>recommended or statutory limits.  |
| Environmental exposure controls  | : | Emissions from ventilation or work process equipment should be<br>checked to ensure they comply with the requirements of<br>environmental protection legislation. In some cases, fume scrubbers,<br>filters or engineering modifications to the process equipment will be<br>necessary to reduce emissions to acceptable levels.   |
| Individual protection measures   |   |  |
| Hygiene measures                 | : | Wash hands, forearms and face thoroughly after handling chemical<br>products, before eating, smoking and using the lavatory and at the end<br>of the working period. Appropriate techniques should be used to<br>remove potentially contaminated clothing. Wash contaminated<br>clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection              | : | Safety eyewear complying with an approved standard should be used<br>when a risk assessment indicates this is necessary to avoid exposure to<br>liquid splashes, mists, gases or dusts. If contact is possible, the<br>following protection should be worn, unless the assessment indicates a<br>higher degree of protection: chemical splash goggles and/or face<br>shield. If inhalation hazards exist, a full-face respirator may be<br>required instead.   |
| Skin protection                  |   |  |
| Hand protection                  | : | Chemical-resistant, impervious gloves complying with an approved<br>standard should be worn at all times when handling chemical products<br>if a risk assessment indicates this is necessary. Considering the<br>parameters specified by the glove manufacturer, check during use that<br>the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures,<br>consisting of several substances, the protection time of the gloves<br>cannot be accurately estimated. |

# Section 10. Stability and reactivity

| Reactivity                          | : | No specific test data related to reactivity available for this product or its ingredients.           |
|-------------------------------------|---|--|
| Chemical stability                  | : | Stable under recommended storage and handling conditions (see Section 7).                            |
| Possibility of hazardous reactions  | : | Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                 | : | Keep away from extreme heat and oxidizing agents.  |
| Incompatible materials              | : | Avoid contact with acetal homopolymers and acetyl homopolymers during processing.                    |
| Hazardous decomposition<br>products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

# Section 11. Toxicological information

This mixture has not been evaluated as a whole for health effects. Exposure effects listed are based on existing health data for the individual components which comprise the mixture.

# Section 13. Disposal considerations

**Disposal methods** 

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty
